

## **HOSE & HYDRANT - 5 COMPETITORS**

*From Official Programme Volunteer Fire Brigades' Demonstration 1939 - Katoomba*

*CONDITIONS: Five men to be seated upon the appliance which will be situated at a distance of 5 yards behind the hydrants, one man with the driver, one man on the off side, two men on near side. Two 100ft. lengths of 2 3/4 in. diameter wet hose coiled from end to end and properly secured through the centre by ordinary straps will be in the hose box. .... The hose may be taken out of the hose box on either the near or off sides or both sides of the appliance. Hose box doors will be closed and must be reclosed after removal of the hose. First length of hose to be obtained, connected to standpipe and run out in the direction of the disc. Second length of hose to be connected to the first, the branch attached and disc struck. Evolution need not necessarily be carried out in this sequence. Branchman when striking the disc must be on or beyond the branch line. ....*
