

600 GALLON PUMP SUCTION - 5 COMPETITORS

Two Suction Events were conducted from 1934 until recent years. In the large suction event 1934 to 1966 Dennis 400gal pumps used, replaced by Dennis 500gal pump Ford D Pumper (1966 - 1976). From 1978 to 2008 the International appliance was used.

.....

'Despite the Depression of the early 1930s The Board's motor replacement continued. All appliances were fitted with sirens in place of rotary gongs and pneumatic tyres replaced the original solid tyres. The magnitude of the replacement program is shown in the following figures. Between 1926 and 1934 the NSWFB acquired more than 70 Dennis 250-400 motors, 19 Dennis 300-400 motors (fitted with two-stage turbine pumps) and 30 Dennis 500-700 motors. In all almost \$600,000 (40 per cent of the Board's assets) was tied up in fire appliances.'
