

## HOSE AND HYDRANT - 2 COMPETITORS

### NEW EVENT FROM 1992

*Introduced as an adaption of Hose and Hydrant 1 Competitor, where the assistant's sole role was to control water for the competitor.  
In this event both competitors combined to complete the evolution. The result was almost halving of the time for the event.*

## **HOSE, HYDRANT AND EXTINGUISHER - 3 COMPETITORS**

This event is used to simulate an attack on a fire in the first instance with an air/water extinguisher followed by one line of hose, which then needs to be lengthened to go deeper into the fire. Time is calculated by adding the time to hit the first disc with the extinguisher water and the third disc with water from the two lengths of hose.
